INDEPENDENT AUDITORS' REVIEW REPORT TRANSLATED FROM CHINESE

(25) PWCR 25001237

To the Board of Directors and Stockholders of Chenbro Micom Co., Ltd.

Introduction

We have reviewed the accompanying consolidated balance sheets of CHENBRO MICOM CO., LTD. and subsidiaries (the "Group") as at June 30, 2025 and 2024, and the related consolidated statements of comprehensive income for the three months and six months then ended, as well as the consolidated statements of changes in equity and of cash flows for the six months then ended, and notes to the consolidated financial statements, including a summary of material accounting policies. Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, "Interim Financial Reporting" that came into effect as endorsed by the Financial Supervisory Commission. Our responsibility is to express a conclusion on these consolidated financial statements based on our reviews.

Scope of review

Except as explained in the following paragraph, we conducted our reviews in accordance with the Standard on Review Engagements 2410, "Review of Financial Information Performed by the Independent Auditor of the Entity" of the Republic of China. A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for qualified conclusion

As explained in Note 4(3), the financial statements of insignificant consolidated subsidiaries were not reviewed by independent auditors. Total assets of these subsidiaries amounted to NT\$2,044,489 thousand and NT\$962,412 thousand, constituting 11% and 6% of the consolidated total assets as at June 30, 2025 and 2024, respectively, total liabilities amounted to NT\$690,224 thousand and NT\$682,892 thousand, constituting 6% and 8% of the consolidated total liabilities as at June 30, 2025 and 2024, respectively, and

the total comprehensive income amounted to NT\$2,129 thousand, NT\$19,332 thousand, NT\$53,413 thousand and NT\$67,901 thousand, constituting 1%, 4%, 5% and 7% of the consolidated total comprehensive income for the three months and six months then ended, respectively.

Qualified conclusion

Except for the adjustments to the consolidated financial statements, if any, as might have been determined to be necessary had the financial statements of consolidated subsidiaries been reviewed by independent auditors as described in the *Basis for qualified conclusion* section above, based on our reviews, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Group as at June 30, 2025 and 2024, and of its consolidated financial performance for the three months and six months then ended and its consolidated cash flows for the six months then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, "Interim Financial Reporting" that came into effect as endorsed by the Financial Supervisory Commission.

The interim period income tax expense is recognised based on the estimated average annual effective income tax rate expected for the full financial year applied to the pretax income of the interim period, and the related information is disclosed accordingly.

5. CRITICAL ACCOUNTING JUDGEMENTS, ESTIMATES AND KEY SOURCES OF ASSUMPTION UNCERTAINTY

The preparation of these consolidated financial statements does not require management to make critical judgements in applying the Group's accounting policies. The management makes critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year; and the related information is addressed below:

The Group's inventories are stated at the lower of cost and net realisable value. There might be material changes to the evaluation of inventory value as the technology changes rapidly, the items of the inventory in the balance sheet date are numerous, and the identification of obsolete inventory and determination of net realisable value are subject to management's judgement.

As of June 30, 2025, the carrying amount of inventories was \$2,685,085.

A. The issuance of domestic convertible bonds by the Company:

(a) The terms of the first domestic unsecured convertible bonds issued by the Company are as follows:

- i. The Company issued \$1,000,000, 0% first domestic unsecured convertible bonds, as approved by the regulatory authority. The bonds mature 3 years from the issue date (January 19, 2024 ~ January 19, 2027) and will be redeemed in cash at face value at the maturity date. The bonds were listed on the Taipei Exchange on January 19, 2024.
- ii. The bondholders have the right to ask for conversion of the bonds into common shares of the Company during the period from the date after three months of the bonds issue to the maturity date, except for the stop transfer period as specified in the terms of the bonds or the laws/regulations. The rights and obligations of the new shares converted from the bonds are the same as the issued and outstanding common shares.
- iii. The conversion price of the bonds is set up based on the pricing model in the terms of the bonds, and is subject to adjustments if the condition of the anti-dilution provisions occurs subsequently. The conversion price will be reset based on the pricing model in the terms of the bonds on each effective date regulated by the terms. The conversion price was NT\$271 on the date of the bonds issuance. The aforementioned conversion price had been reset as NT\$266.6 (in dollars) according to the terms starting from July 1, 2024 (the effective date of price resetting).
- iv. The Company may repurchase all the bonds outstanding in cash at the bonds' face value at any time after the following events occur: (i) the closing price of the Company's common shares is above the then conversion price by 30% for 30 consecutive trading days during the period from the date after three months of the bonds issue to 40 days before the maturity date, or (ii) the outstanding balance of the bonds is less than 10% of total initial issue amount during the period from the date after three months of the bonds issue to 40 days before the maturity date.
- v. Under the terms of the bonds, all bonds redeemed (including bonds repurchased from the Taipei Exchange), matured and converted are retired and not to be re-issued; all rights and obligations attached to the bonds are also extinguished.

B. Regarding the issuance of convertible bonds, the equity conversion options amounting to \$154,262 were separated from the liability component and were recognised in ‘capital surplus—share options’ in accordance with IAS 32. The call options and put options embedded in bonds payable were separated from their host contracts and were recognised in ‘financial assets or liabilities at fair value through profit or loss’ in net amount in accordance with IFRS 9 because the economic characteristics and risks of the embedded derivatives were not closely related to those of the host contracts. The effective interest rate of the bonds payable after such separation was 2.0417%.

C. For the six months ended June 30, 2024, the bondholders exercised conversion rights on convertible bonds amounting to \$200 in total par value, of which \$7 was converted into ordinary shares. The net conversion amount exceeded the par value of the converted ordinary shares, and \$212 was transferred to capital surplus - additional paid-in capital. Additionally, the discount on bonds payable related to the converted bonds at the transition date, financial assets at fair value through profit or loss and capital surplus share options were \$10, \$1 and \$30, respectively, which were also transferred to capital surplus - additional paid-in capital.

D. For the six months ended June 30, 2025, convertible bonds amounting to \$24,200 in total par value were requested for conversion into 91 thousand ordinary shares. The amount was recorded under ‘certificate of entitlement to new shares from convertible bonds’ and ‘capital surplus-additional paid-in capital’ amounting to \$908 and \$26,195, respectively, because the change in registration has not yet been completed.

E. On July 21, 2025, the Company had met the early redemption requirements in accordance with the terms of the bonds. The Company will exercise the redemption of the bonds during the period from August 11, 2025 to September 9, 2025. The redeemable price is 100% of the face value of the bond. The effective date for the bond redemption is set on September 9, 2025. Related information is provided in the “Market Observation Post System” at the website of the Taiwan Stock Exchange.

B. Financial risk management policies

- (a) The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial position and financial performance.
- (b) Risk management is carried out by a central treasury department (Group treasury) under policies approved by the Board of Directors. Group treasury identifies, evaluates and hedges financial risks in close cooperation with the Group's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas and matters, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

C. Significant financial risks and degrees of financial risks

- (a) Market risk

Foreign exchange risk

- i. The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the USD. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations.
- ii. Management has set up a policy to require group companies to manage their foreign exchange risk against their functional currency. The group companies are required to hedge their entire foreign exchange risk exposure with the Group treasury, and primarily hedge using natural hedge.

iii. The Group's businesses involve some non-functional currency operations (the Company's and certain subsidiaries' functional currency: NTD; other certain subsidiaries' functional currency: USD and RMB). The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

iv. The total exchange (loss) gain, including realised and unrealised, arising from significant foreign exchange variation on the monetary items held by the Group for the three months and six months ended June 30, 2025 and 2024, amounted to (\$121,049), \$23,155, (\$104,360) and \$78,178, respectively.

Price risk

- The Group's equity securities, which are exposed to price risk, are the held financial assets at fair value through other comprehensive income.
- Shares were issued by the domestic companies. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 1% with all other variables held constant, other comprehensive income for the six months ended June 30, 2025 and 2024 would have increased/decreased by \$2,100 and \$1,929, respectively, as a result of other

comprehensive income on equity investments classified as at fair value through other comprehensive income.

Cash flow and fair value interest rate risk

- i. The Group's interest rate risk primarily arises from various borrowings. Borrowings with variable rates expose the Group to cash flow interest rate risk. Borrowings issued at fixed rates expose the Group to fair value interest rate risk. For the six months ended June 30, 2025 and 2024, the Group's borrowings were issued at fixed rate and are denominated in New Taiwan dollars.
- ii. If the borrowing interest rate of New Taiwan dollars had increased/decreased by 1 basis point with all other variables held constant, profit, net of tax for the six months ended June 30, 2025 and 2024 would have decreased/increased by \$72 and \$86, respectively. The main factor is that changes in interest expense result from floating rate borrowings.

(b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations. The main factor is that counterparties could not repay in full the accounts receivable based on the agreed terms, and the financial assets at amortised cost and equity instruments stated at fair value through other comprehensive income.
- ii. According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors.
- iii. Individual risk limits are set based on internal or external factors in accordance with limits set by the supervisors of credit control. The utilisation of credit limits is regularly monitored.
- iv. If the contract payments were past due over 30 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition.
- v. The Group adopts the assumption under IFRS 9, that is, the default occurs when the contract payments are past due over 90 days.
- vi. The Group classifies customer's accounts receivable in accordance with credit risk on trade. The Group applies the simplified approach using the provision matrix and loss rate methodology to estimate expected credit loss. The Group's notes receivable have no significant impairment losses.

vii. The Group used the forecastability of The New Basel Capital Accord to adjust historical and timely information to assess the default possibility of accounts receivable. As of June 30, 2025, December 31, 2024 and June 30, 2024, the loss allowance is as follows:

| | Not past due | Up to 30 days past due | 31 to 60 days past due | 61 to 90 days past due | 91 to 180 days past due |

viii. Movements in relation to the Group applying the simplified approach to provide loss allowance for accounts receivable are as follows:

| | Six months ended June 30, | |
|---------------------------------|---------------------------|---------------------|
| | 2025 | 2024 |
| | Accounts receivable | Accounts receivable |
| At January 1 | \$ 959 | \$ 1,936 |
| Provision for impairment loss | 1,274 | 9,964 |
| Effect of exchange rate changes | (130) | 151 |
| At June 30 | <u>\$ 2,103</u> | <u>\$ 12,051</u> |

For the six months ended June 30, 2025 and 2024, losses on impairment of accounts receivable arising from customer contracts amounted to \$1,274 and \$9,964, respectively.

ix. For investments in debt instruments at amortised cost, the credit rating levels are presented below:

| | June 30, 2025 | | | |
|------------------------------------|-------------------|-------------------------------------|----------------------|-------------------|
| | Lifetime | | | |
| | 12 months | Significant increase in credit risk | Impairment of credit | Total |

| -Time deposits | <u>\$ 205,411</u> | <u>\$ -</u> | <u>\$ -</u> | <u>\$ 205,411</u> |
| | December 31, 2024 | | | |
| | Lifetime | | | |
| | 12 months | Significant increase in credit risk | Impairment of credit | Total |

| Financial assets at amortised cost | | | | |
| -Time deposits | <u>\$ 230,823</u> | <u>\$ -</u> | <u>\$ -</u> | <u>\$ 230,823</u> |

The financial assets at amortised cost held by the Group are all time deposits with banks. The credit risk rating has no significant abnormal situation.

(c) Liquidity risk

- i. Cash flow forecasting is performed in the operating entities of the Group and aggregated by Group treasury. Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs.
- ii. The table below analyses the Group's non-derivative financial liabilities based on the remaining period at the balance sheet date to the contractual maturity date. The analysis is as follows:

Non-derivative financial liabilities:

| <u>June 30, 2025</u> | Less than 1 year | Between 1 and 3 years | Between 3 and 5 years | Over 5 years |

| Guarantee deposits received | 803 | - | - | - |

Non-derivative financial liabilities:

| | <u>Less than 1 year</u> | <u>Between 1 and 3 years</u> | <u>Between 3 and 5 years</u> | <u>Over 5 years</u> |

| Guarantee deposits received | 798 | - | - | - |

iii. The Group does not expect the timing of occurrence of the cash flows estimated through the maturity date analysis will be significantly earlier, nor expect the actual cash flow amount will be significantly different.

(3) Fair value information

A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

B. Financial instruments not measured at fair value

(a) Except for those listed in the table below, the carrying amounts of cash and cash equivalents, financial assets at amortised cost, notes receivable, accounts receivable, other receivables, guarantee deposits paid (shown as other non-current assets), short-term borrowings, accounts payable, other payables, lease liabilities, long-term borrowings (including current portion) and guarantee deposits received (shown as other non-current liabilities), are approximate to their fair values.

| | June 30, 2025 | | | |
|-------------------------------|-------------------|----------------|----------------|----------------|
| | Fair value | | | |
| | <u>Book value</u> | <u>Level 1</u> | <u>Level 2</u> | <u>Level 3</u> |
| Financial liabilities: | | | | |
| Bonds payable | \$ 946,473 | \$ - | \$ 957,703 | \$ - |

| December 31, 2024 | | | | |
|------------------------|------------|---------|------------|---------|
| | Fair value | | | |
| | Book value | Level 1 | Level 2 | Level 3 |
| Financial liabilities: | | | | |
| Bonds payable | \$ 960,192 | \$ - | \$ 971,763 | \$ - |

| June 30, 2024 | | | | |
|------------------------|------------|---------|------------|---------|
| | Fair value | | | |
| | Book value | Level 1 | Level 2 | Level 3 |
| Financial liabilities: | | | | |
| Bonds payable | \$ 950,537 | \$ - | \$ 965,398 | \$ - |

(b) The methods and assumptions of fair value estimate are as follows:

Bonds payable is measured at present value, which is calculated based on the cash flow expected to be paid and discounted using a market rate prevailing at balance sheet date.

C. The related information on financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities are as follows:

(a) The related information on the nature of the assets and liabilities is as follows:

(b) The methods and assumptions the Group used to measure fair value are as follows:

i. The instruments the Group used market quoted prices as their fair values (that is, Level 1) are listed below by characteristics:

| Listed shares | |
|---------------------|---------------|
| Market quoted price | Closing price |

ii. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date.

- iii. For high-complexity financial instruments, the fair value is measured by using self-developed valuation model based on the valuation method and technique widely used within the same industry. The valuation model is normally applied to derivative financial instruments, debt instruments with embedded derivatives or securitised instruments. The evaluation of derivative financial instruments is based on evaluation models widely accepted by market users, such as discount methods and option pricing models.
- iv. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Group's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, for example, model risk or liquidity risk and etc. In accordance with the Group's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments at the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.

Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently, updating inputs used to the valuation model and making any other necessary adjustments to the fair value.
