

Independent Verification Opinion

Verification Opinion No.:
C859937-2025-AG-TWN-DNV

Issued Place and Date:
Taipei, 05 May, 2026

Page 1 of 2

This is to verify initiate reporting of Greenhouse Gas Inventory Management Report (2025) of

CHENBRO MICOM CO., LTD.

Scope of Verification

DNV Business Assurance (DNV) has been commissioned by CHENBRO MICOM CO., LTD. (hereafter "the Organization") to perform a verification of the greenhouse gas statements of Greenhouse Gas Inventory Management Report (2025) (hereafter the "Inventory Report") in Taiwan, R.O.C., with respect to the sites listed in Appendix A.

The Reporting Boundary for the verification including direct GHG emissions and removals, indirect GHG emissions from imported energy, indirect GHG emissions from transportation, indirect GHG emissions from products used by the Organization and indirect GHG emissions associated with the use of products from the Organization. The further descriptions for the Reporting Boundary listed in Appendix B.

Verification Criteria and GHG Programme

The verification was performed on the basis of Financial Supervisory Commission Sustainable Development Roadmap Scheme and ISO 14064-1:2018, CNS 14064-1:2021 as well as criteria given to provide for consistent GHG emission identification, calculation, monitoring and reporting. The verification was conducted in accordance with ISO 14066:2023, ISO 14065:2020, ISO 14064-3:2019.

Verification Opinion

It is DNV's opinion that the Inventory Report (2025), which was published on May 05, 2026 (Version 1.2), is free from material discrepancies in accordance with the verification criteria identified as stated above. The opinion is decided based on the following approaches,

- For the Direct (Category 1) GHG emissions and Indirect GHG emissions from imported energy (Category 2), the reliability of the information within the Inventory Report (2025) was verified with reasonable level of assurance.
- For the other indirect GHG emissions, the involved information was verified with limited level of assurance.

Also, the GHG information as stated in Appendix C has been verified during the process.

Management Representative

Supplement to Verification Opinion

Process and Methodology

The reviews of the Inventory Report and relevant documents, and the subsequent follow-up interviews have provided DNV with sufficient evidence to determine the fulfilment of stated criteria.

Quantification of Greenhouse Gas Emission

The Inventory Report covering the period 1st January, 2025 to 31st December, 2025, it is DNV's opinion that GHG emissions and removals identified within the Reporting Boundary has been included in the Inventory Report as claimed in accordance with the verification criteria identified as stated above, and results in quantification of GHG emissions that are real, transparent and measurable.

Organizational Boundary of Verification

☐ Financial Management Control; ☒ Operational Management Control; ☐ Equity Share

GHGs Verified

☒ CO₂ ☒ CH₄ ☒ N₂O ☒ HFC₅ ☒ PFC₅ ☒ SF₆ ☒ NF₃

Quantification of Emissions (in tonnes CO₂e)

The Global Warming Potential (GWP) defined in IPCC AR6(2021) has been chosen and correctly referred by the Organization.

Category	CHENBRO MICOM CO., LTD.	Total
1: Direct emissions		1,006.0670
2: Imported energy indirect emissions*		11,712.5896
3: Indirect GHG emissions from transportation		216.2848
4: Indirect GHG emissions from products used by organization		83,395.8580
5: Indirect GHG emissions associated with the use of products from the organization	Not Significant Emissions	
6: Other Emission Sources	Not Significant Emissions	

(*In Taiwan, indirect emissions from imported energy were calculated based on the 2024 electricity emission factor of 0.474 kg CO₂e/kwh published by the Bureau of Energy of the Ministry of Economic Affairs.)

(**In China, indirect emissions from imported energy are calculated based on a factor of 0.5827 kg CO₂e/kWh, as specified for Jiangsu in the "Announcement on the Release of the 2023 Power Carbon Dioxide Emission Factors" issued by the Ministry of Ecology and Environment of the People's Republic of China.)

APPENDIX B

The Reporting Boundary of CHENBRO MICOM CO., LTD. Greenhouse Gas Inventory Management Report (2025)

Category	Reporting Boundary
Direct GHG emissions and removals	Mainly from Fugitive emission and industrial processes emission, other GHG sources or sinks inside organizational boundaries and that are owned or controlled by the organization.
Indirect GHG emissions from imported energy	The amount of greenhouse gas emissions produced by the input of electricity and energy.
Indirect GHG emissions from transportation	Emissions from business travel mainly due to fuel burnt in mobile sources of combustion. - Aircraft Mileage reference GREAT CIRCLE MAP. - THSR emission factor quoted from the Taiwan High-Speed Rail Carbon Footprint Information.
Indirect GHG emissions from products used by an organization	Purchased goods and services. - Selection of representative raw materials: The quantified materials primarily consist of steel for the metal stamping process and cardboard boxes for packaging. - Tap Water. - Fuel and energy-related activities not included in Scope 1 & 2. (e.g., upstream emissions from purchased fuels, electricity, and utilities). Emissions from the disposal of solid and liquid waste.
The scope of other indirect emissions (other than Imported Energy with specified/limited list of sources) was defined by the Organization's own pre-determined criteria for significance of indirect emissions, considering the intended use of the GHG inventory.	

The Appendix forms an integral part of this Certificate, which shall be invalid when used without the Appendix.

Lack of fulfilment of conditions as set out in the Verification Agreement may render this Verification invalid. This Verification Opinion is based on the information made available to us and the engagement conditions detailed above. Hence, DNV cannot guarantee the accuracy or correctness of the information. DNV cannot be held liable by any party relying or acting upon this Verification Opinion.
